

# Spyglass

Keep your eye on the horizon on your seafaring adventures with a paper crafted Spyglass.

Time Required : About 30 Minutes

Difficulty Level : Beginner

## Project Instructions

- STEP 1

Decorate the paper cup using markers.
- STEP 2

Roll cardstock into a tube about 2" in diameter x 8 1/2" and secure with double-stick tape.
- STEP 3

Poke the end of the scissors into the center of the bottom of the cup and cut a hole about the size if the diameter of the paper tube.

Tip: Adult supervision is recommended to cut a hole in the bottom of the paper cup.
- STEP 4

Insert the paper tube into the hole in the paper cup and push it through until about 2" is sticking out of the mouth of the cup. Wrap the rubber band around the end of the paper tube, then pull the tube back up into the cup. The rubber band will keep the tube from pulling out of the cup and allow it to telescope.
- STEP 5
